Processing the request for a rate adjustment requires completion of ALL PARTS of this application. Complete the Narrative Description of the Application for Rate Adjustment on pages 3 and 4, as well as the statements on pages 5 and 6. Read the accompanying instructions and fill in the entries on pages 9 through 31. Dollar amounts should be rounded to the nearest dollar. NO ENTRY SHOULD BE LEFT BLANK. If an amount is zero, enter a zero. **Any application that is found to be insufficient will not be processed until the deficiencies are corrected per A.A.C. R14-2-103.B.7.**

A completed application also **requires** notification of customers of the rate request. The format of the customer notification letter is provided on page 32 of this application. Use the language and form of this letter in notifying customers. The customer notification **must** be provided to customers on the same date as the rate application is filed. A copy of this notice, together with a **notarized** cover letter stating the method of customer notification and the date the notification was sent to the customers, **must** accompany the application form.

Please provide any supplementary information the Company believes will assist in the evaluation of the rate request. For example, if expense items are substantially different from the latest annual report filed with the Commission, or if significant plant additions have been made since the prior rate increase, attach supporting explanations for those changes to the application. Clearly label any attachments and staple them to the application.

Selection of a Test Year for the utility is an important part of the application. A Test Year older than the year reflected in the most current Annual Report filed with the Utilities Division is usually considered outdated. Questions regarding the selection of a Test Year should be addressed to the Chief of Accounting and Rates at (602) 542-0743.

Please contact the Arizona Department of Revenue and request a certificate of compliance letter of good standing regarding taxes. Submit a copy of this compliance certificate.

UTILITY PLANT IN SERVICE INSTRUCTIONS

Instructions for Page 13

Begin the computation of utility plant in service by completing the worksheet on page 13 labeled Plant Additions and Retirements by Year. On this worksheet insert the dollar amount of plant additions and retirements for each account by year. Provide all additions and retirements for all years beginning with the Test Year in the prior rate case and ending with the test year used in this application. If there are more than two intervening years, make copies of page 13 to report all intervening years.

Instructions for Page 14

Upon completion of the above task, please add all additions on page 13 per plant account and enter the total on page 14 (Plant Summary), column B (Total Additions). Similarly, add all retirements by plant account and enter the total on page 14, column C (Total Retirements).

To assist you in the completion of page 14, please refer to the Commission Decision issued in the Company's prior rate case. That Decision established the value for the Original Cost of the plant and accumulated depreciation at the end of the prior test year. It may be necessary to refer to the associated Staff Report for individual account detail relating to the totals listed in the Decision.

Place the original cost of the plant in service per the prior decision in column A (Plant in Service Per Prior Decision).

Complete column D (Test Year End Total), of page 14, for each plant account by adding column A and B and subtracting column C.

The totals calculated by plant must then be copied to page 15 (Utility Plant in Service), in the column titled Original Cost.

Instructions for Page 15

The Test Year End Totals by plant account on page 14 must be recorded to the Utility Plant in Service worksheet on page 15, in the column titled Original Cost. The second column (Accumulated Depreciation) will include the accumulated depreciation as stated in the Commission's prior Decision plus each year's depreciation expense since the prior Test Year. The third column, Original Cost Less Depreciation is calculated by subtracting Accumulated Depreciation from Original Cost for each account.

Note: For assistance with any of the above, please contact the Chief of Accounting and Rates at 602-542-0743.

BILL COUNT INSTRUCTIONS

A quarterly Bill Count must be provided for each of the meter sizes the Company had in service during the Test Year. If you had more than one meter size in service, reproduce the forms on pages 27 through 31, inclusive, so that you will submit one set of Bill Count forms (i.e. one Bill Count for each quarter and a Bill Count Summary), for each meter size. An item such as a metered standpipe would be considered to be a different size meter, since it may have a different tariff rate than the other size meters.

A Bill Count Summary sheet is provided on page 31. Please note that each bill over 100,000 gallons should be shown separately. The number of bills in each line will be added to produce a total of all bills at the bottom of the page.

The first step in producing the Bill Count is to collect all monthly bills rendered for metered water sales during the 12 months of the Test Year. The collection of bills must include bills to part-time customers and to customers who are no longer on the system, but who were on the system for any part of the Test Year.

Only include bills for water sold during the Test Year. For example, assume that the Test Year runs from January 1st to December 31st (calendar year) and you normally bill on January 5th. The bill sent out at that time would cover December 1st through 31st usage of the prior year and should not be included. The first billing to be used for the year would be the February 5th billing and the last billing to be used would be the billing of January 5th of the succeeding year.

Sort the bills by each quarter, by meter size, so that a separate bill count is produced for each three-month period by meter size. On each quarterly Bill Count sheet, place a tally for each bill in the appropriate gallonage range. After tallying each bill, add the tallies in each gallonage range and report the tally totals in the column provided.

Note: For explanation of any of the above, please contact the Chief of Accounting and Rates at 602-542-0743.

CUSTOMER NOTIFICATION

HUMBOLDT WATER SYSTEMS, INC. has applied to the Arizona Corporation Commission for an adjustment in rates. The current rates have been in effect since March 1999. An increase in rates is necessary at this time in order to qualify for a loan from the Water Infrastructure Finance Authority. The proceeds of this loan will be used for plant improvements and a Water Treatment Facility to remove Arsenic and Nitrates that have been found to be in excess of Safe Drinking Water Standards prescribed by EPA and adopted by the Arizona Department of Environmental Quality. Based on the Company's un-audited Test Year results, Humboldt Water Systems, Inc. realized an operating loss of \$4,977. The Company is requesting a revenue increase of \$ 44,550 or 35 % of total revenues. Please see the attached pages 9 and 11 of the Company's application for the current and proposed rates.

The Application is available for inspection during regular business hours at the offices of the Commission in Phoenix at 1200 West Washington Street (for Tucson, call 800-535-0148 if located outside the Tucson local calling area or 520-628-6555 if inside the Tucson local calling area) and at Dewey Humboldt City Hall or Southwestern Utility Management 2015 N Forbes Tucson, AZ. Please be advised that the rates and charges ultimately approved by the Commission may be higher or lower than the rates and charges requested in the Application.

Customer input is an important part of the Commission's analysis of the requested adjustment and is a factor in determining whether a hearing will be conducted. Customers should bring to the Commission's attention any questions or concerns related to the Company's Application, including service, billing procedures or other factors important in determining the reasonableness of charges. Customers may have the right to intervene in this matter. Customers wishing to communicate with the Commission, or request information on intervention in the proceeding, should contact the Commission's Consumer Services Section at 800-222-7000 (if located outside the Phoenix local calling area) or 602-542-4251 in the Phoenix local calling area. Customers may also contact the Tucson Commission office by calling 800-535-0148 (if located outside the Tucson local calling area) or 520-628-6555 in the Tucson local calling area.

Customers are advised that the Commission may act upon the Application without a hearing. Regardless of whether a formal hearing is held, customer comments submitted in writing will be placed in the office file, which the Commission reviews prior to making its final decision on the Application. It is important that customers contact the Commission within 15 days of the receipt of this notice so that the Commission's Staff can consider customer comments and concerns in developing its recommendations to the Commission.
